**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

2. The disclosure is objected to because of the following informalities: The specification is objected to because of the British spelling, such as "colour" and "stabilization".

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5, and 11 – 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Adam et al. (EP 0 908 767).

Adam et al. have a method of washing substances from a coated material (film 12).

The film (12) travels up an inclined planar surface (14) by means of rollers (18, 20).

Wash solution is supplied at the upper portion of the surface (14) between the material (12) and the surface (14). The surface incorporates non-smooth resistance means.

shown in Figs. 2 – 5; grooves, channels are shown in figures 2-4 and ribs are shown in figure 5. The wash solution enters at inlet (22).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1 – 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vaughn, IV (US 5,022,418).

Vaughn, IV have an apparatus for washing photographic material (20). The material (20) travels up an inclined surface. The resistance means is a woven fabric (19). The method differs from the claimed invention in that the material (20) travels down the incline, rather than up the incline. One of ordinary skill in the art at the time the invention was made would have recognized that having the material (20) and the wash

solution move in opposite directions improves the liquid agitation and promotes even processing. Therefore, one of ordinary skill in the art would be motivated to modify the direction of travel of the material causing the material to travel counter to the flow of the washing/processing liquid without departing from the spirit or scope of the invention.

### ***Allowable Subject Matter***

8. Claims 8 – 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dasai et al. (US 5,266,994), Piccinino Jr., et al. (US 6,010,256) disclose process apparatus for processing a photographic material that travel up and inclined path in counter flow to the direction of the processing solution and has non-smooth resistance means incorporated in the inclined surface.
